# Royal IHC to provide new cable lay system for Boskalis

Royal IHC is delighted to announce the award of a significant contract from Boskalis for the delivery of an advanced modular cable lay spread (MCLS).

The state-of-the-art cable lay system will be used for installation of inter-array power cables and its cable protection system (CPS) in offshore windfarms. The system has some advanced features which will provide the client with a marked advantage during normal lay operations. Royal IHC will deliver the entire spread including: elevated cable highway, chutes, working habitats, quadrant handling system, active heave compensated winch, A&R winches and deck winches. This will be delivered with an integrated control system linking between new and client owner-furnished equipment.

Equipment safety is at the core of all Royal IHC designed equipment and the MCLS will be delivered with a new generation centralised control suit. Carefull consideration has also been brought to the mobilisation of the vessel, adopting a sophisticated modular system which will minimise the effort, timescale and risk traditionally associated with this stage of a campaign.

Royal IHC is proud to be supporting its prestigious client Boskalis in the advancement of the renewable energy industry. This system adds to the company's extensive track record in the cable lay market and demonstrates our ongoing commitment to the sustainable industries.

Note for the editors, not for publication:

### **Company profile**

Royal IHC is a leading supplier of maritime technology and determined to play a leading role in making the maritime industry more efficient and sustainable.

Anchored in rich Dutch maritime history, Royal IHC sets out to expand its position as a leading supplier of maritime technology and expert craftsmanship. With the right people with the right skill set on board, and driven by innovation, we provide a clear competitive edge to our worldwide customers in the dredging, offshore, mining and defence industries. More than equipment, vessels and services, we deliver reliable, integrated solutions that improve operational efficiency and allow for a more sustainable performance. As we navigate new waters in an ever-changing world, our aim remains finding the smartest and safest way forward for both our customers and our people. Working together, we are creating the maritime future.
